Subject: Great Lakes System Navigational Improvements Study

I am an avid boater and property owner of approximately 1400 feet of shoreline in an environmentally sensitive area on Wellesley Island in the St. Lawrence River . We have suffered through damage from high water and oil spills in the past and strenuously oppose any further ""improvements"" in the future. Please forward any future notices, comment periods or public meetings pertaining to this study. My address is William M. Forrest, P.E., 101 Killian Drive, Syracuse. NY 13224 Thank you.
